Profile Summary

Software Engineer with hands-on experience in MERN stack, DevOps tooling (Docker, Kubernetes, Jenkins), and Machine learning. Solved 800+ DSA problems and built production-style projects spanning intrusion detection, real-time systems, and REST API development. Seeking a Software Engineer role to apply strong problem-solving skills, coding proficiency, and system design fundamentals.

Technical Skills

Programming Languages: C++, JavaScript, Python

AI / ML: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, LangChain, TensorFlow, PyTorch, FastAPI, Streamlit

Web Technologies: HTML5, CSS3, React.js, Express

DevOps Tools: Git/Github, Docker, Terraform, Kubernetes, Linux, Jenkins, AWS

Backend & Databases: API Integration, Node.js, MySQL, MongoDB, Node.js

Core Concepts: Data Structures & Algorithms (DSA), OOPS, DBMS, Computer Networks, Operating System

Soft Skills: Problem Solving, Communication

Projects

Intrusion Detection System (IDS)

March 2026

- Designed and implemented a hybrid Intrusion Detection System (IDS) combining classification (XGBoost) and anomaly detection (Isolation Forest).
- Achieved 98.9% accuracy with XGBoost classifier and 87% anomaly detection accuracy, outperforming baseline models.
- Conducted Exploratory Data Analysis (EDA) and handled class imbalance (79:21) using balanced class weights.
- Engineered features by applying Random Forest feature importance, selecting top 12 impactful features from 80+ network flow attributes.
- Data Handling: CICIDS-2017 dataset, preprocessing (missing values, duplicates, encoding), feature engineering.
- Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, XGBoost

Virtual Queue Management System (WaitWise)

Jan 2026

- Built a Full-Stack Virtual Queue System using the MERN stack (MongoDB, Express, React, Node.js) to eliminate physical waiting lines and reduce customer wait times by 50%.
- Implemented Real-Time Features via polling (with WebSockets planned) for instant notifications when a user's turn is near.
- Engineered a Responsive Frontend using React.js and Tailwind CSS, featuring an admin dashboard, user queue interface, and mobile-first design.
- Developed a Secure REST API with JWT authentication, role-based access control (Admin/User), and endpoints for real-time queue tracking and analytics.
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, JWT, REST API, Mongoose, Git

Education

Master of Computer Applications (MCA)

Maulana Azad National Institute of Technology (MANIT) Bhopal, Madhya Pradesh

CGPA: 7.88

2024 – 2027

Certifications

- DevOps Internship (Vaidsys Technologies) – Remote (Nov 2025 – Dec 2025)**
Completed a structured internship program focused on DevOps practices and tools. Gained hands-on experience with CI/CD pipelines and containerization (Docker).
- Front End Web Development Internship – IBM SkillsBuild (Aug–Sept 2025)**
Completed a 6-week internship on Front End Web Development in collaboration with AICTE, implemented by Edunet Foundation and IBM SkillsBuild.
- Deloitte Technology Job Simulation (Forage):** Completed practical tasks in coding and development, gaining exposure to real-world problem-solving in a professional technology consulting environment.
- Problem Solving Intermediate (HackerRank):** Certified in intermediate-level problem-solving and algorithmic thinking through HackerRank's skill certification test.

Achievements

- **Naukri Campus — CodeQuezt #21 Coding Contest:** Secured All-India Rank 64 out of 26,445 participants, demonstrating strong competitive programming and problem-solving abilities.
- **LeetCode:** Solved 600+ problems and earned the 365 Days Badge for consistent daily problem-solving.
- **GFG 160 Days of Problem Solving:** Completed a 22-week structured program, strengthening DSA and coding skills through intensive, daily practice.
